Delivering world-class healthcare in India

A vision that first came to Dr. Naresh Trehan, while practising surgery at the NYU Medical Center in the USA. For every 1000 Indian patients he treated there, another 1000 couldn't even afford to fly down. That's when he realised that India needed to have an advance multispecialty medical institution of its own. An institution which not only treats, but trains and innovates too, while providing international standards of technology, infrastructure, clinical care, and a fusion of traditional Indian and modern medicine.

MEDANTA HEART INSTITUTE houses the sub-specialities of Cardiac Surgery, Electrophysiology and Pacing, Clinical and Preventive Cardiology and Interventional Cardiology, where an integrated team of cardiac surgeons and cardiologists works in tandem. Backed up with the latest technology including a unique hybrid operating suite, the dedicated team of Cardiac Surgery doctors has performed a staggering 50,000+ CABG surgeries. The team is expert in off-pump CABG, robotic heart surgery, and minimally invasive valve and coronary heart bypass techniques.

The Most Cutting Edge Technology & Advanced Facilities:

- 250 beds, 350 critical care beds
- 45 operating theaters with hybrid facilities
- 5 Cath Labs with Bi-Plane
- Da Vinci robotic system surgery for Cardiac, Urology, Gastroenterology & Gynaecology.
- Hybrid OT with Zeego Robotic Cath Lab
- Brain Suite, OT with Miyabi MRI system
- Infinity VMAT / IGRT
- Integrated Brachytherapy
- PET CT
- 3-T MRI
- 256 slice CT Scanner with 1/10th the radiation

Facilities Available :

Air Ambulance, Emergency & Trauma Care, Wards & Rooms, Critical Care Units, eCLINIC-Telemedicine Service, Patient Support Services, Lab Tests & Diagnostics, Day Care.
